

Mechanical Department Manager Jacksonville, Florida

We're expanding. A unique opportunity exists to fill a **Mechanical Department Manager** position vacated by our existing manager, who is relocating to launch our newest branch office. We are seeking an experienced Mechanical Engineer with leadership experience to lead our established mechanical engineering group in our headquarters, located in **Jacksonville, Florida**.

Responsibilities:

Responsibilities for this position include design oversight, manpower scheduling, project management, client management, mentoring and training, and mechanical design.

Qualifications:

- Registered Mechanical Engineer with 7+ years experience
- Broad range of HVAC and plumbing design experience
- Managerial experience and project design oversight
- AutoCAD proficiency (Revit familiarity is preferred)
- Fire Protection design experience
- LEED accreditation and commissioning certification are preferred

Firm Description:

We are a multi-discipline engineering firm, based in Jacksonville, Florida. Our firm offers structural, mechanical, electrical, fire protection, LEED, commissioning, and technology design services to our clients, who are primarily architects. We are well established in the North Florida area and also have branches in Atlanta and Charlotte. As noted above, this position is for our Jacksonville office.

Representative Benefits:

- Paid employee health care
- Employer matching 401k plan
- Profit sharing and bonus program
- Stock ownership opportunities
- Paid holiday and annual time off

See our **website** www.mcveighmangum.com for additional information about our firm and benefits package.
